

AKASH JADHAV

Aspiring Full Stack Developer — Java — React.js

✉ akashjadhav76365@gmail.com 📞 +91-8792226165 📍 Bengaluru, Karnataka, India
🌐 JadhavAkash8 📄 Akash-Jadhav

OBJECTIVE

Computer Science Engineering graduate with hands-on experience in Java, Spring Boot, React.js, SQL, and Android development. Completed a 15-week internship focused on Generative AI and Firebase. Passionate about building scalable web applications and solving real-world problems.

EDUCATION

KS Institute of Technology, Bengaluru	2022–2026
Computer Science Engineering	CGPA: 8.28
Allama Iqbal Independent P.U College, Bidar	2021
Pre-University, Science (2nd PUC)	77%
Vidyaranya High School, Bidar	2019
Class X	70.1%

SKILLS

Programming Languages: Java, JavaScript, SQL

Frontend: HTML5, CSS3, React.js

Backend: Spring Boot, Hibernate, REST APIs

Database: MySQL, Firebase

Cloud and Tools: AWS (EC2, S3, VPC, Lambda), Git, GitHub, VS Code, Android Studio, Postman

EXPERIENCE / INTERNSHIP

Android App Development Intern — MindMatrix.Ed 15 Weeks

Completed a 15-week Android App Development internship focused on Generative AI. Developed applications using Kotlin, Firebase Authentication, Retrofit API and Gemini AI while gaining practical experience in UI/UX, API integration and debugging.

TRAINING

Java Full Stack Development with AI — Tap Academy

Completed training in Core Java, Advanced Java, Spring Boot, Hibernate, MySQL, HTML, CSS, JavaScript and React.js. Built full-stack web applications through hands-on projects.

PROJECTS

Arogya Nidhi — Healthcare Scheme Eligibility & Hospital Finder App

- Developed an Android-based healthcare assistance application using Kotlin and Android Studio.
- Implemented eligibility checking for government healthcare schemes.
- Added hospital filtering and document checklist guidance features.
- Integrated Firebase Authentication for secure user login.

AI FOR HUNGER (SustainBite)

- Designed a mobile application connecting food donors with NGOs and food banks.
- Used AI and cloud technologies to match surplus food with recipients.
- Implemented live food availability reporting and instant
- Integrated location-based services to efficiently connect donors with nearby NGOs.notifications.

Ginger Plant Disease Detection — Python, OpenCV, Keras

- Developed an AI-based application to detect and classify ginger plant diseases.
- Enhanced image quality and segmented infected regions.
- Applied deep learning techniques for accurate disease classification.

CERTIFICATIONS

- **Innovating with Google Cloud AI** – Google Cloud AI (view)
- **Java Full Stack Development with AI** – Tap Academy.
- **Certificate of Publication**– International Journal of Advanced Research in CSCE
